E-Safety in the home and at school

Using the internet at home and at school, is a key part of children's education. The internet can unlock a whole world of possibilities for the education of your child and has transformed the way teachers teach and how children learn.

Along with the excellent possibilities the internet unlocks, there are also added dangers that children and parents need to be aware of in order to keep children safe on the internet, without restricting the learning that can take place.

This guide will hopefully raise awareness to the dangers online and advise parents and carers how best to deal with problems if and when they arise.

Key Dangers on the internet

- Talking to **strangers** online
- Giving out **personal information**
- **Meeting strangers** from the internet
- Sending **inappropriate images** from phones or tablet computers.
- **Viruses** and phishing scams attached to e-mails
- Coming into contact with **extremist views**.
- **Cyberbullying**

More detailed information about these dangers can be found at the links on the side of the page.

What are we doing at Glebe to protect young people?

Educating young people about E-safety is something that we take very seriously at Glebe. E-safety is taught across all key stages and students are constantly involved in new and interesting ways of learning about E-safety and supporting their peers with that knowledge too.

An example of this is the annual e-safety video that year 8 students create, designed to teach others about their newfound knowledge around internet safety. The video is available to view on the school website and it was also shown in assembly as part of Safer Internet Day 2015. The E-safety tab on our website is regularly updated and we aim to make this an easily accessible resource for carers and parents for all the latest E-safety related information.

At Glebe we also have sophisticated web filters provided by the LGFL, which prevent children accessing inappropriate websites.

Pastoral Care

Students' who attend Glebe know that there is a network of support if they have issues in school or at home relating to E-safety. There is always an adult who children can talk to and safeguarding is of the utmost importance.

For those pupils who don't feel confident enough to talk to someone online we educate pupils about useful websites such as **CEOP Online** and **Childline**, who offer confidential advice and reporting methods for young people at risk.

The Future of E-safety at Glebe

At Glebe we regularly review our E-safety guidance and policies to ensure that we maintain a high standard of care for the young people who attend our school. We feel that the link between ourselves and parents / carers is an extremely important part of providing comprehensive protection for young people using the internet. Our policies have the full support and backing of our governors.

We are planning a training event on the next IEP day for parents and carers to attend, aimed at providing detailed information about the risks on the internet and how best to deal with them, if and when they arise. Details of the event will be disclosed closer to the time, where you can register your interest in attending one of the workshops.
